

#### Innhold

- Hva er Matbit?
- Hvorfor Matbit?
- Demo

# Hva er Matbit?

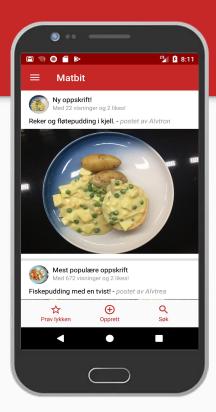

#### Matbit er...

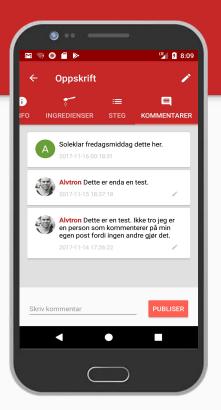

- Et sted å finne matoppskrifter
- Et sted å dele matoppskrifter
- En sosial app for matglade mennesker

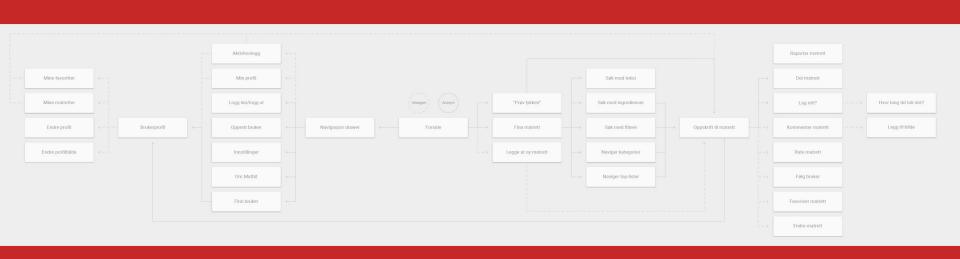

Forside

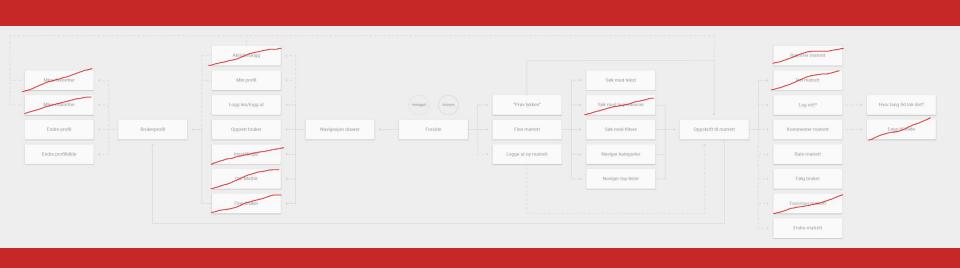

#### Hva er unikt med Matbit?

- Av brukere, for brukere
- Driver seg selv
- Dynamisk

Oppskriftens kommentarfelt

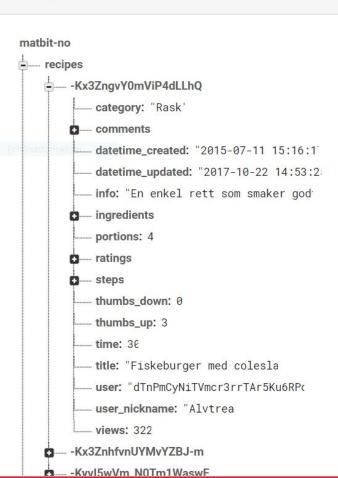

```

```

## Typisk klasse mot Firebase Database

#### Recipe

- String: ID til oppskrift
- RecipeData: data til oppskrift
- Funksjoner for oppskrift
  - thumbsUp()
  - averageRating()
  - uploadIngredients()
  - ...

#### RecipeData

• Ren data-klasse for oppskrift i Firebase Database

#### Dependencies

- Google Play Services
- Google Firebase Database
- Google Firebase Storage
- Google Firebase Auth
- Google Firebase Messaging
- Glide
- JodaTime
- de.hdodenhof CircleImageView

Google services

Database

Fildatabase

Brukerautorisering

Notifikasjoner

Last bilder fra database

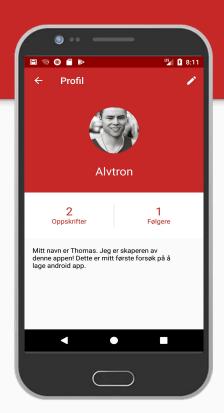

Dato/Tid standardisering

Sirkelære bilder

## **Hvorfor Matbit?**

#### **Hvorfor Matbit?**

- Matlaging er gøy ;)
- Norge mangler sosiale matapper
- Nei til administrering, ja til brukerdrift
  - YouTube
  - Facebook
  - Twitter

# Demo

### Videreutvikling

- 1. Fikse bugs
- 2. Test app mot familie og venner
- 3. Legge til "Mine oppskrifter"
- 4. Grafiske justeringer

# Spørsmål?
